1. The merchant marine radio station at Kanienna Gora, Gdynia, is located in a one-story villa at 7, ul. Sieroszewskiego. The frontage of the cream-colored building is approximately 10 meters. The house is in a large garden in which there are a number of trees. The entrance gate is unguarded, and the house door was found wide open. The building was formerly occupied by the Wojskowa Komenda Uzupełnień (Regional Recruiting Office). It appears to be used only as a radio station.
2. The operational power of the station is 400 watts. Its three masts are described as follows:
  - a. Number one is a wooden pole approximately 40 m high, tapering from the base, painted black and treated for preservation, and kept in its position by steel cables. A wire, three to five mm in diameter, leads to mast number two. The aerial wire is secured at both ends by a number of white china insulators.
  - b. Number two is metal, blue, quadrilateral, approximately one meter at the base, narrowing toward the top, and is kept in position by strong steel cables. It is linked by aerial wires to the other two masts.
  - c. Number three is the same as number one. The distance between mast number one and mast number two is 30 to 40 meters; between two and three, 15 to 20 meters.
